Your Reports. Who, when, why?
Measures. Improving understanding and design
Future reports

Introduction of the CORC BOARD

Your Reports. Who, when, why?

Pie chart

- Who reads your report? List these in the bottom right and colour code them.
- How important is it that they understand the messages inside the report?
Draw this onto the pie chart to help influence the design of your reports.

Two teams

Report timeline - What happens to your report once you have received it.

Asset map - How important is each aspect of the report (most important in the centre).

Measures. Improving understanding and design

Voting activities:

1) Which example do you think would deliver the information most clearly? And which one would you like to see in your service's report?

2) Which method of showing your data's reliability and completeness do you feel delivers this message most clearly? And which one would you like to see in your service's report?

Future reports

In an ideal world what would you/ your service like to get out of your reports.

The CORC board

We have developed the CORC board based on your feedback.

OUR DATA

We collect information with your permission. If permission has been granted, we take off your name and any information which could be used to identify you and then pass this to CPIC, a research team who look at how to improve our service, national services and inform national policy. Your data makes a big difference to us, the general population and others with mental health difficulties.
